

OBJECTIVE MOVEMENT INTELLIGENCE

STOP FLYING BLIND ON WORKER HEALTH

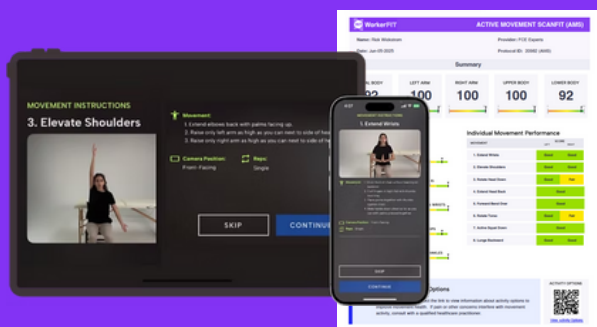

Musculoskeletal (MSK) disorders—whether work-related or personal—are the leading cause of injury, treatment and disability costs in the workplace.

Unlock Workforce Musculoskeletal Health with AI

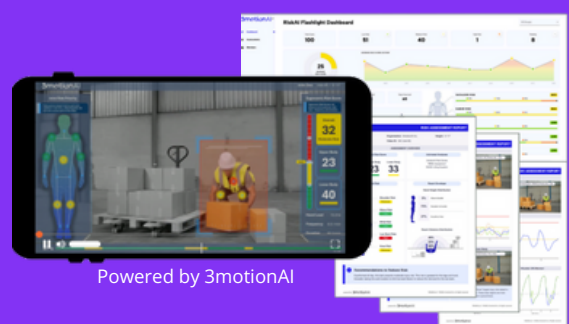

ScanFIT uses AI-powered objective movement analysis to provide key metrics that drive cost-effective safety measures and improve workforce movement health.

Worker Movement Risk Screen

- **Quick & efficient** - Complete 5-minute total body movement scans in an office setting
- **Empowered workforce** – Drive worker engagement with movement performance intelligence and resources that promote healthy physical activity.
- **Evidence-based** – Movement screen protocol was researched for reliability and validity

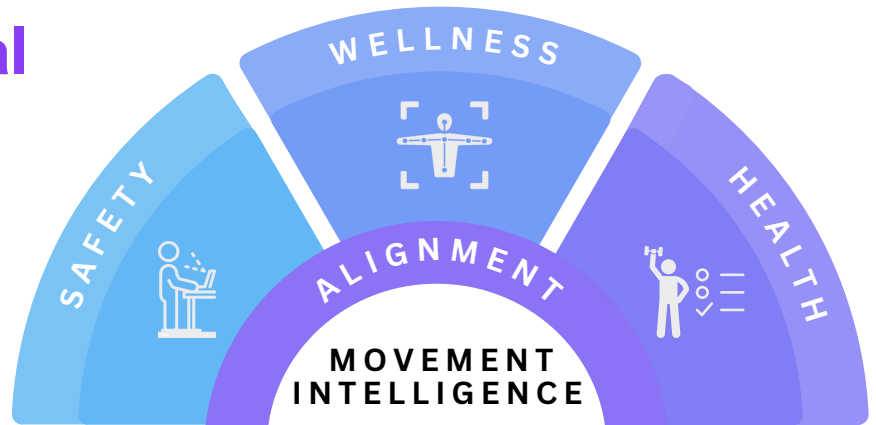

Job Task Risk Analysis

- **Real-time risk detection** - Instantly highlight job task risks with immediate feedback to prioritize action
- **Centralized dashboard** - Display risk data across tasks, employees, and departments with scores, leaderboards, and assessments
- **Advanced reporting tools** – Video overlays and PDF reports to support tailored solutions

Total Musculoskeletal (MSK) Health

Detect musculoskeletal risks early and enable targeted interventions for all three pillars of WorkerFIT's operating system for total musculoskeletal worker health.

PREVENTION & EARLY DETECTION

- Work Task RiskAI determines MSK risks of job tasks to justify ergonomic improvements and job fitness screens
- Active Movement ScanFIT quantifies movement health risks of workers to lower MSK spend and improve productivity

HEALTH & FITNESS PROMOTION

- Active Movement ScanFIT is a fun wellness screen of movement health risks that promotes healthy physical activity
- Workers with movement deficits are directed for healthy movement options or coaching to promote fitness & health

DISABILITY MANAGEMENT

- Comparing pre-injury with post-injury Active Movement ScanFIT results promotes realistic goals for health plans
- Periodic monitoring of movement health expedites functional recovery and transition from healthcare to fitness

The ScanFIT Advantage

Unlike single-purpose AI movement screen products, ScanFIT delivers:

- Versatility to assess and compare movement health risks of workers and job tasks in one app
- Personalized feedback that workers can act on immediately
- Evidence-based methods to assess worker or job task risks
- Aggregate risk insights to guide safety and health strategies
- WorkerFIT Movement Health Screener training and certification
